SOUR THE TEST TO T

COMPLEXES, CONSISTING OF ALPHA-1, ALPHA-2, BETA AND DELFA SUBUNITS IN A 1:1:1:1 RATIO. THE CHANNEL ACTIVITY IS DIRECTED BY THE POREFORMING AND VOLTAGE-SENSITIVE ALPHA-1 SUBUNIT. IN MANY CASES, THIS SUBUNIT IS SUFFICIENT TO GENERATE VOLTAGE-SENSITIVE CALCIUM CHANNEL ACTIVITY. THE ATXILIBARY SUBUNITS BETA AND ALPHA-2/DELFALLINKED BY A DISCULPIDE BRIDGE REGULATE THE CHANNEL ACTIVITY (BY

SIMILARITY)

SUBCELLULAR LOCATION: Integral membrane protein.
TISSUE SPECIFICITY: Expression is higher in the forebrain than in TISSUE SPECIFICITY. Expression is higher in the forebrain than in the electric lobe.

DOMAIN: Each of the four internal repeats contains five hydrophobic transmembrane segments (\$1, \$2, \$3, \$5, \$6) and one positively charged transmembrane segment (\$4). \$4 segments probably represent the voltage-sensor and are characterized by a series of positively charged amino acids at every third position. SIMILARITY: Belongs to the calcium channel alpha-1 subunits

```

; Sequence 3, Application US/09627650B
; Patent No. 6406872
; GENERALI INFORMATION:
; APPLICANT: Bander. Bruce
; APPLICANT: Jamber. Bruce
; APPLICANT: Jorgensen, Erik
; TITLE OF INVENTION: Nemacode Neuromuscular Junction GABA Receptors and
; TITLE OF INVENTION: Methods Related Thereto
; FILE REFERENCE: 21101.000903
; CURRENT APPLICATION NUMBER: US/09/627,650B
; CURRENT FILING DATE: 1999-11-08
; PRIOR FILING DATE: 1999-11-08
; PRIOR FILING DATE: 1999-11-09
; NUMBER OF SEQ ID NOS: 50
; SOFTWARE: Patentin Ver. 2.1
; SEQ ID NO 3

Sequence 15, Application US/09238303B

Sequence 15, Application US/09238303B

Patent No. 6284253

GENERAL INFORMATION:

TITLE OF INVENTION: No. 6284253el Feline Immunodeficiency Virus Nucleotide Sequence

TITLE OF INVENTION: US/09/238,303B

CURRENT FALICATION NUMBER: US/09/238,303B

CURRENT FILING DATE: 1999-01-28

EARLIER APPLICATION NUMBER: US/09/238,303B

NUMBER OF SEQ ID NOS: 17

LENGTH: 65
                                                                                                                                                                                                                                                                                                                                                        protein encoded by the open reading frame (orfE) of a recombinant viral clone constructed from the genomic DNA of a Pallas's cat feline immunodeficiency virus
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       OTHER INFORMATION: protein encoded by the open reading frame (orfE) of a OTHER INFORMATION: recombinant viral clone constructed from the genomic DNA of a OTHER INFORMATION: Pallas's cat feline immunodeficiency virus
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          APPLICANT: Barr, Margaret C.
